

# DVE Telepresence Podium™

## How To Be There Virtually — From The Comfort of Your Office

The DVE Telepresence Podium virtually presents a person standing at a podium even though they may be thousands of miles away. The system works under normal room lighting conditions. At the distant site the speaker uses a DVE eye contact solution and appears virtually with eye contact to the entire audience or classroom. No longer is a person's image bound by the borders of a rectangular screen. The DVE Telepresence Podium was designed with rolling portability in mind and also fits through doorways with ease. The DVE Telepresence Podium creates the most visually compelling means to present a speaker or teacher remotely.

- ▶ Imaged person appears to be virtually standing at a podium
- ▶ Ideal for distance learning, events, conferencing, and training
- ▶ Eye contact when image originates from a DVE eye contact display
- ▶ 3-D appearing graphics and objects for stunning presentations
- ▶ Portable and quickly folds up to move through doorways
